Electrical wiring diagram

Installation conditions:

- The ambient temperature should be lower than the required temperature in the control cabinet.
- When the space in the cabinet is insufficient to install the side-mounted filter fan, the top-mounted fan can be considered.
- The fan on the top of the cabinet protects the electrical components of the cabinet by pumping hot air from the top of the control cabinet and dispersing the heat inside the cabinet out of the cabinet.
- The use of centrifugal fan can not only avoid the eddy current caused by the discharge of ordinary shielded pole fan, but also reduce the noise caused by air friction.

REF600 series cabinet top ventilator

350x350x148mm | 415-500 m³/h

Colour	RAL7035, color can be customized
Protection category	IP54 standard, IP55 plus precision filter mat, IP56 plus precision filter mat and protective cover.

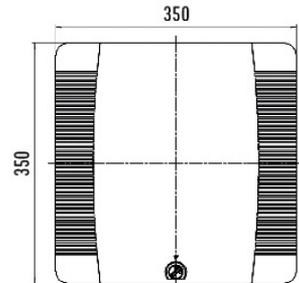

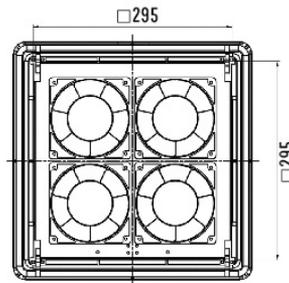

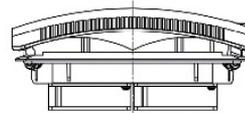

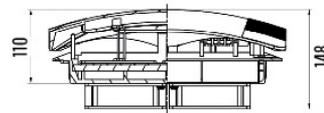

Features:

- Easy and fast snap in mounting that does not require screw
- Adjustable mounting clamps fit for different cabinet thickness range from 1.5 to 3.5mm
- IP54 protection, G3 standard filter pad
- Tool-less and quick replacement of the filter pad, just turn the button on the top
- The standard color is RAL7035, other colors as per request.
- AC voltages as standard type, DC voltages could be offered

KTF series cabinet top ventilator

400x133x400mm | 500-942 m³/h

Note: Use of a temperature controller or temperature display device is suggested for optimal performance.
Supply lists: A complete set of assemblies for installation directly on cabinet, including filter mat

Colour	RAL7035,color can be customized
Protection category	IP54 standard, IP55 plus precision filter mat, IP56 plus precision filter mat and protective cover.

Features:

Easy to fit and maintain

- Innovative mounting clamps enables flexible snap-in the filter fan either from inside or outside of the enclosure
- Easily connecting with power supply via a plug
- Easy maintain, safe and quick replacement of filter pad

color: RAL 7035

Protection class, conform to IEC60529 standard:

without filter mat

with filter mat

Large air throughput range and high efficiency

- Air throughput range: 500-1500m³/h

High protection level

- An exquisite labyrinth construction and super quality polyurethane foam seal ensures the ingress protection rate up to IP55
- International certification and approval

KRF series cabinet top ventilator

366x366x98mm | 620-1410 m³/h

Protection category	IP54 standard, IP55 plus precision filter mat, IP56 plus precision filter mat and protective cover.

Technical explanation:

The premise of using top-mounted fan:

Ambient temperature should be lower than the temperature that is required to be in the switchboard. Taking top-mounted fan into account when there isn't enough space for a side-mounted filter fan in the cabinet.

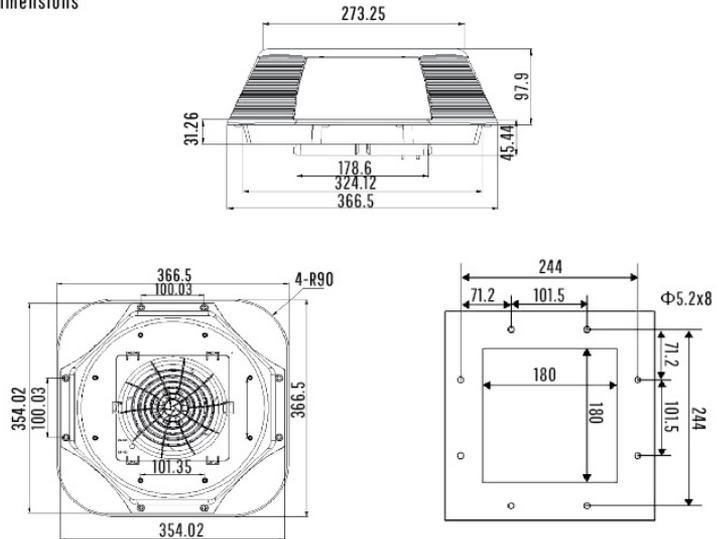

Top-mounted fan of the cabinet will bleed the air from the top of the cabinet and drive the heat out so as to protect the electric apparatus and keep them running at the temperature within controllable range. And the structure is more proper because it won't take up space in the cabinet.

EN 60529/10.91 reaches IP54. The retractable high-power centrifugal fan is able to prevent moisture as well as mechanical damage, with its labyrinth rain-proof structure, which with the help of the sealing frame, can reach an IP code up to IP54 as per EN 60 529/10.91. The centrifugal fan is mainly useful for discharge of high-heat load at peak efficiency. Adoption of the centrifugal fan will be able to reduce the noise resulting from air friction as well as avoiding the vortex discharged by normal shaded pole fan.

Using LK33 or EF series Exit Filters at the side of the cabinet not only can prevent water and dust entering the cabinet, also make the air through the whole cabinet for cooling.

Interior

The precondition to use the top fan is that the ambient temperature should be lower than the temperature required in the cabinet.

Function

The high-power centrifugal top fan can vent the high heat load by the greatest degree. The centrifugal fan not only can avoid the vortex vented by the general shield magnetic fan, but also can reduce the noise caused by the friction of air. The FK series of Exit Filter can be used in the inlet in order to prevent from entering the humidity and dust.
